-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

1. The RCE filed 03/08/06 is acknowledged.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1-3 are rejected under 35 U.S.C. 103(a) as being unpatentable over Aoki et al. (6,407,982) in view of Yao (6,050,848).

Aoki et al., figures 1, 5 and 9 show a card-type terminal comprising (501):

- a tray (1) slid in and out freely with a memory card (D) mounted; and
- a guide (22) helps the tray slide in and houses the tray,

wherein the memory card is placed on the tray, the tray is slid into the guide, and thereby the memory card is installed in the card-type terminal; and

wherein the tray comprising a holder (5) that secures a forward-end center section of the memory card on the tray.

Aoki et al. disclose the claimed invention as described above except for the holder attached to a forward-end center section of the tray.

Yao, figure 1 shows an adapter base (10) for receiving a cartridge memory (20), the adapter base having a lip (12) that reads as the holder attached to a forward-end center section of the tray. It would have been obvious to one of ordinary skill in the art

Art Unit: 2839

at the time the invention was made to provide Aoki et al. to have the lip (12) is located at a center of the base (10) for better holding and in order to have more security between the tray and the card.

Regarding claim 2, Aoki et al., figure 7B, the tray comprising an elastic restraining piece (6) that secures a backward-end center section of the memory card.

Regarding claim 3, Aoki et al., figures 9 and 10, disclose a metal cover (32) cover the guide, wherein the guide comprising a pair of guards (26) that demarcate a tray loading slot by sticking out from an edge of the metal cover and extend like cantilever beams from both sides of a width orthogonal to the insertion direction of the tray, forming enough space between the guards to allow the elastic restraining piece to enter, except for the pair of guards like cantilever beams.

Response to Arguments

4. Applicant's arguments with respect to claim 1-3 have been considered but are moot in view of the new ground(s) of rejection.
